Recipe of the week. Instead of making a recipe we provide you need to research and prepare your own recipe.

It is spring/summer and the fields are full of crops being planted ready for the harvest. One of the staple foods in this country and around the world is bread which is made from wheat.

Can you list as many different types of bread as you can think of? Then do some research and find out about different types of bread. Do they have any special significance such as Panettone from Italy which is made to celebrate Christmas and New Year or the various Jewish unleavened bread products that were made quickly as they fled the Passover?

Write a fact file about your bread. Why is it different? What makes it special? Is there any religious or historical significance to the recipe or the tradition of the bread?

If you can try and have a go at baking your bread. Take a photo and send it to your class teacher. One of it straight out the oven looking perfect and one of you eating it.

Science – The James Webb Telescope will be the largest, most powerful, complex telescope ever built. The telescope will be launched into space using a rocket in 2021. It will have to be strong enough to withstand the vibrations during the launch. Use an egg to represent the telescope and design a rocket that will surround and protect the egg/telescope during the launch.

History - As part of the London 2012 Olympics countries were asked to name a traditional game which represented their culture and traditions. Can you research some traditional games from different countries and use them as inspiration to design your own game. Think about how the game is played, how you win and what equipment is needed. Where possible, test their game and make any changes needed

PSHE – Do some yoga. Go line and find some yoga for children and have a go at some of the poses.

W/B: 01.06.2020

Choose from this selection of activities to complete in the afternoons this week – you do not need to do them all. Some activities may take longer than others and do not need to be done in one afternoon. Take your time and enjoy working either on your own, with your brothers/sisters or with someone else in your household. If you can, take pictures of your efforts and send them to your teacher via your class email.
